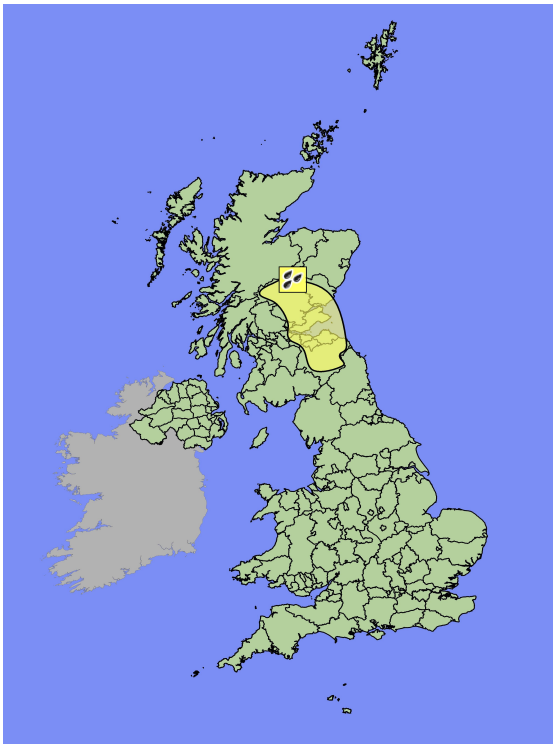
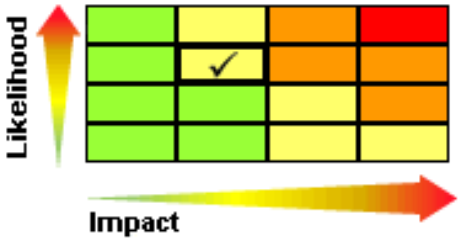
National Severe Weather Warning Service





Chief Forecasters Assessment
There is some uncertainty in developments through the rest of today. However, at present, there is the likelihood that a cold frontal zone will be re-activated and become quite slow-moving later on today and into the early part of Wednesday, leading to some prolonged and occasionally fairly heavy rainfall. Some surface water issues as a result of the continued saturated conditions.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **16:00 on Tue, 10th Jul 2012** until **23:59 on Tue, 10th Jul 2012**

Rain will become prolonged and occasionally heavy later during Tuesday afternoon and evening.

The public should be aware of the risk of localised flooding.
